DETAILED ACTION

This application has been examined. Claims 1-17 are pending.

Priority

The effective date of the subject matter in the claims in this application is December 27, 2001.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 04/17/2003 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Venigalla (US Patent 6766361).

With respect to Claim 1 , Venigalla discloses in a communication device including a wireless applications protocol (WAP) operating environment, an apparatus for enabling an external function from within the WAP operating environment comprising: (Figures 2-5, Column 3 Lines 1-25, Column 4 Lines 30-45), a external function interface coupled to the WAP operating environment and operable to receive from the WAP operating environment a request to launch an external application; (Column 8 Lines 15-25, Column 10 Lines 10-65) a handle configured to permit control of the external application from within the WAP operating environment, the handle being generated by the external function interface and returned to the WAP operating environment responsive to the request to launch the external application; (Column 5 Lines 10-40, Column 7 Lines 20-50) and a library associated with the external application, the library including information to initiate a connection between the external application and the WAP operating environment, wherein the handle corresponds to the connection.

With respect to Claim 2 , Venigalla discloses the apparatus of claim 1, wherein the external function interface includes a list of external applications available to be launch from within the WAP operating environment. (Column 3 Lines 1-25, Column 8 Lines 60-65, Column 9 Lines 1-10)

With respect to Claim 3 , Venigalla discloses the apparatus of claim 2, wherein the list of external applications is dynamically generated upon an initialization of the WAP operating environment on the communication device. (Column 8 Lines 1-15, Lines 60-65)

With respect to Claim 4 , Venigalla discloses the apparatus of claim 2, wherein the list of external applications is dynamically generated on a periodic basis. (Column 8 Lines 60-65, Column 12 Lines 10-15)

With respect to Claim 5 , Venigalla discloses the apparatus of claim 1, wherein the external function interface comprises a plug-in to the WAP operating environment. (Column 5 Lines 10-40, Column 7 Lines 1-10, Column 8 Lines 15-25)

With respect to Claim 6 , Venigalla discloses the apparatus of claim 1, wherein the handle comprises an instance identifier. (Column 8 Lines 15-25)

With respect to Claim 7 , Venigalla discloses the apparatus of claim 1, wherein the library comprises code embedded within the external application. (Column 5 Lines

10-40, Column 12 Lines 20-40)

With respect to Claim 8 , Venigalla discloses the apparatus of claim 1, wherein the library is separate from and accessible by the external application. (Column 12 Lines 20-40)

With respect to Claim 9 , Venigalla discloses the apparatus of claim 1, wherein the apparatus enables the WAP application to discover, launch and control the external application. (Column 9 Lines 1-5)

With respect to Claim 10 , Venigalla discloses an a wireless communication network including a mobile station adapted according to the Wireless Applications (WAP) protocol to provide a WAP operating environment, a method for enabling an external function within the WAP operating environment comprising the steps of: (Figures 2-5 Column 3 Lines 1-25, Column 4 Lines 30-45) receiving from the WAP operating environment a request to launch an application external to the WAP operating environment; generating a handle associated with the application, (Column 8 Lines 15-25, Column 10 Lines 10-65) the handle being configured to permit control of the external application from within the WAP operating environment; and providing a library associated with the external application, wherein the library includes information to

initiate a connection between the external application and the WAP operating environment, wherein the handle corresponds to the connection. (Column 5 Lines 10-40, Column 7 Lines 20-50)

With respect to Claim 11-17, the Applicant discloses a method with same limitations as described in Claims 1-10. Claims 11-17 are rejected on the same basis as Claims 1-10.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to the enclosed PTO-892 form.
